

# Iowa K-12 Vulnerability Scans – 2022-25

## Your World-Class way to protect the district from cybercriminals.

With the right TECHNOLOGY, PEOPLE AND PROCESSES in place, school districts can “plug the holes” hackers use to steal data and exploit student data.

A managed vulnerability scanning service frees your IT department to devote efforts to provide the needed technology to enable teachers and administrators to improve student achievement.

Rely upon our proven methodologies, knowledge and experience to work with your IT department to help prevent cybercriminal activity in your District.

Why would we want to do this? We get asked this all the time. **Here are the benefits:**

Attend to vulnerable areas before they are exploited by cybercriminals.

Improve security systems' efficiency.

Prevent external threats to the District.

Enhance credibility with tax payers and other stakeholders.

Understand the risk level associated with the District's IT Infrastructure.

Creates an inventory of devices on the network.

Manage and allocate resources efficiently.

Establishes a plan of remediation.

Saves manual efforts and cost to fix a network breach.

Ensures compliance.
